PRESENTED BY:

Indonesian Society of Dermatology & Venereology

MESSAGE FROM THE PRESIDENT OF ARUNA INTERNATIONAL SUMMIT

It is my great pleasure to welcome you to the ARUNA International Summit, an international congress dedicated to advancing dermatology and aesthetic medicine through evidence-based science, ethical practice, and cultural understanding.

Guided by this year's theme, "Beyond Borders, Beneath the Skin: Global Aesthetics for Skin of All Color", ARUNA International Summit brings together experts from across the world to explore inclusive, science-driven approaches that respect the biological diversity and cultural context of skin of color. The program is designed to bridge global perspectives with regional expertise, ensuring innovation translates into safe, effective, and equitable patient care. We invite you to engage in meaningful discussions, collaborative learning, and professional connection as we shape the future of aesthetics and skin health. Together.

Danang Tri Wahyudi, MD., FINS DV, FAADV
President of ARUNA International Summit

MESSAGE FROM THE PRESIDENT OF INDONESIAN SOCIETY OF DERMATOLOGY & VENEREOLOGY

The Indonesian Society of Dermatology and Venereology represents a community of more than 2,500 dermatologists with extensive experience in organizing large-scale national scientific meetings. Building on this strong foundation, we are committed to broadening our expertise beyond national boundaries and contributing to the global advancement of dermatology and aesthetic medicine.

In an aesthetic landscape often driven by short-lived trends and commercial interests, the ARUNA Aesthetic Summit is envisioned as a science-based and ethically grounded platform. ARUNA, an acronym for Aesthetic and Regenerative Unity through Network and Alliances, is derived from Sanskrit, meaning "the glow before sunrise," symbolizing Southeast Asia's emergence as a center of innovation and thought leadership in aesthetic and regenerative medicine.

Through the ARUNA Aesthetic Summit, we aim to set a new benchmark for education, collaboration, and innovation by bridging the clinical, research, and industry sectors. This initiative represents a collective commitment to shaping a more inclusive, ethical, and globally connected future for the aesthetic industry.
